

Haakon Delivers Custom REVIT Files to Design Engineers

Haakon Industries is proud to announce the addition of REVIT support to their design support services. Haakon offers air handling unit family files complete with 3D models, schedule information and pipe and duct connectors that designers can import directly into any REVIT BIM project with no modifications required.

Haakon Industries Provides Design Services for All Types of Custom Air Handling Units

Haakon offers industry-best design service for any custom air handling unit.

Haakon's factory design team includes professional engineers and designers with extensive education and experience.

Regardless of application, complexity, arrangement requirements, or build specifications, Haakon's professional designers deliver accurate designs with models available to customers in both AUTOCAD and REVIT file formats.

State of the Art Design Software Is Vital

To generate REVIT files, Haakon utilizes their state-of-the-art proprietary engineering software which is integrated directly with their manufacturing systems to ensure 100% buildable designs every time.

Expertise is Essential

Haakon Industries is proud of their best-in-class status in delivering accurate

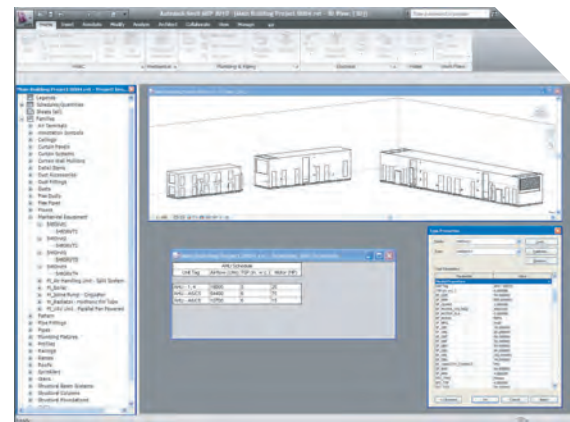

Mechanical room model developed by REVIT showing custom Haakon air handling and heat recovery units.

designs for complex custom air handling solutions. Haakon uses only experienced, highly trained, design professionals, resulting in the most accurate, high quality designs in the industry. Factory designers check all aspects of the air handling unit to assure optimal component arrangements, transitions, accessibility, specification compliance, and air handling unit performance.

Benefits to Designers

Working with Haakon Industries offers designers numerous advantages:

- REVIT files designers can integrate directly into their BIM projects
- CAD drawings to integrate into plans
- Industry-best designs that offer:
 - Accurate dimensions
 - Psychrometric analysis
 - Arrangement recommendations
 - Component selections
- ASHRAE 90.1 fan power checks
- Acoustic Analysis
- Industry-best speed in delivery of AUTOCAD/REVIT designs from experienced factory designers
- Rapid design revisions
- Ultimate flexibility
- Access to experienced factory air handling unit designers

About Haakon Industries:

A world leader in manufacturing custom designed air handling units, Haakon Industries excels in providing customers with the highest level of flexibility, engineering, quality, durability and energy efficiency leading to lowest lifecycle cost.

Haakon specializes in providing engineered solutions for hospitals, clean rooms, pharmaceutical applications, automotive, university, laboratory, food industry, industrial and institutional needs.

Visit www.haakon.com to find out more about Haakon Industries or to contact a

Haakon representative about your project requirements and to assist you in engineering design, performance ratings and AUTOCAD or REVIT drawings.
